

Flexible Safer

Designed to secure items that cannot be protected by alarming wraps or hard tags, the Sensormatic Flexible Safer is a reusable and transparent way to open-merchandise with confidence. Available in AM Ferrite or RF technology, the Flexible Safer will alarm EAS pedestal systems if protected products pass through the detection zone.

Scientifically engineered to be clean and strong for all environments, Flexible Safer is an ideal solution for protecting high-theft products such as SD Cards, cosmetics, HD cables, razor blades, box apparel and ink cartridges. Its slim design also helps maximize selling space and allow shoppers to freely view and purchase items.

Flexible Safers are available in three sizes and constructed from three clear, strong and lightweight plastics laminated together to form a strong, yet flexible, composite product. It is extremely easy to use and available in various magnetic strengths to work with the full line of Sensormatic magnetic detachers.

Retailer Values

- // Constructed from PET, Polyethylene (PE) and nylon materials to form a strong, yet flexible, product
- // Slim design helps maximize retail selling space for increased sales
- // Easy application and removal helps improve store operations
- // Available in 3 sizes and 2 technologies for an adaptable solution
- // Reusable design helps maximize your Return on Investment (ROI)
